Pro-pole™

Temporary solar street lighting

The Pro-pole™ lighting package is a great alternative to diesel lighting towers, providing an even spread of quality light with no glare, no diesel fumes, no noise or ongoing diesel costs. Able to be easily moved around the site with a forklift or crane without the need for dismantling the pole. Transport & Main Roads compliant for road works barrier conflict points (10 lux on the ground).

Light source	Cree LEDway or XSP 25w to 40w LED depending on requirement. 10 year warranty. Designed and made in the USA.
Operation mode	100% illumination all night, dimming or part night runtime options.
Batteries	Long life with 4 to 5 full nights back up depending on requirement. 5 year + 5 year prorated warranty. Designed and made in Australia.
Tilting pole	Galvanised steel conforming to all Australian Standards. Designed and made in Australia.
Concrete block	Numerous options engineered for region A, B and C. Recessed pick up points, stackable. Designed and made in Australia.
Energy Management System	Fully compliant to AS/NZS 3000 and AS/NZS 4509. Designed and assembled in Australia from local and imported components.
